CAREER SUMMARY

B.Com Information Technology graduate with hands-on expertise in full-stack web development, Python, and relational/NoSQL database systems. Proficient in engineering scalable applications across the MERN and PERN stacks, alongside crafting data-focused architectures with Pandas, NumPy, and SQL. Proactive collaborator with strong experience across academic projects and hackathons. Eager to leverage strong problem-solving capabilities in an entry-level Full-Stack Developer, Software Developer, or Data Engineer role.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), SQL, HTML5, CSS3
Frontend & UI	React.js, Next.js, Tailwind CSS, Responsive Web
Backend & APIs	Design Node.js, Express.js, Flask, RESTful APIs
Databases	PostgreSQL, MongoDB
Data & Analytics	Pandas, NumPy, Matplotlib, Seaborn, Power BI,
Tools & Workflow	Tableau Git, GitHub, VS Code

KEY PROJECTS

Sales Data ETL Pipeline

Python, Pandas, PostgreSQL

- Designed and implemented an automated ETL pipeline extracting raw sales records, transforming anomalies, and staging clean datasets.
- Leveraged Pandas and NumPy for vectorised processing, structuring schema-validated tables for analytical queries and dashboards.

E-Commerce Data Warehouse

Python, SQL, PostgreSQL

- Architected relational database schemas organizing multi-dimensional customer, product, transaction, and order records.
- Formulated optimized SQL analytical queries and built data ingestion scripts in Python for seamless analytics.

Automatic Time-Table Scheduler

PERN Stack (PostgreSQL, Express, React, Node)

- Developed an automated scheduling engine designed to eliminate resource conflicts across multi-department academic timetables.
- Implemented responsive interactive schedule views using React.js backed by robust relational operations in PostgreSQL.

Full-Stack E-Commerce Platform

MERN Stack (MongoDB, Express, React, Node)

- Engineered an end-to-end shopping application featuring product catalog filtering, cart management, and secure user authentication.
- Integrated REST APIs with stateful React components and MongoDB document storage.

AI Conversational Assistant

Python, Flask, JavaScript

- Collaborated in a fast-paced hackathon team to build an interactive AI chatbot delivering real-time user query resolutions.
- Connected a Python/Flask inference backend with an asynchronous JavaScript web front-end.

Portfolio Website

Next.js, Tailwind CSS

- Built and deployed a responsive personal portfolio showcasing projects, technical skills, and live web applications.

EDUCATION

B.Com (Information Technology)

KPR College of Arts, Science, and Research, Coimbatore
CGPA: 6.8 / 10.0 2023 – 2026

Higher Secondary Certificate (HSC)

Literacy Mission Matriculation Hr. Sec. School
2021 – 2023
Aggregate: 77%

AREAS OF FOCUS

Full-Stack Development	Data Engineering	ETL Pipelines
SQL & Relational DBs	AI Integration	Responsive UI/UX

HACKATHONS & HONORS

1st Prize – Internal Hackathon

2025

Awarded 1st place for presenting an innovative chatbot-based solution.

Smart India Hackathon (SIH)

Participant

National innovation challenge; team solution design and prototyping.

EVOLVE26 Singapore

2026

Participated in a technology-focused event featuring industry sessions, breakout tracks, and discussions on technology, leadership, and data impact.

2nd Prize – Football Tournament

2022

Literacy Mission Matriculation Hr. Sec. School.
